

## 1967 JAGUAR E-TYPE SERIES 1

Having travelled over from Jacksonville, Florida to join us back in 2016, the bodywork has been extensively repaired and is now in stage one primer. The engine is complete and the first test has been carried out with Webber carburetors fitted. The original triple SU's will be fitted once completed.

## 1949 MGYT

The bodywork has been repaired and is now finished in the original Clipper Blue. The bright-work has been chromed and polished, the engine is fully rebuilt and the interior is in the final stages of production. This promises to be one truly exceptional classic!

## WE SHARE YOUR PASSION

If you have a classic yourself and are looking for a workshop who share the same passion as you do, then Bridge Classic Cars are here for you. From full restorations to general maintenance, MOTs and repairs we have it covered.
